Market outlook

Market outlook

- ◆ According to the UNWTO's latest Panel of Experts survey, the outlook for 2021 is mixed and the overall prospects for a rebound in 2021 seem to have worsened. Nonetheless, the gradual roll-out of the COVID-19 vaccine is anticipated to help restore traveller confidence, contribute to easing of travel restrictions and slowly normalise travel for 2021. UNWTO noted that it could take between 2.5 and 4 years for international tourism to return to 2019 levels and domestic demand is expected to recover faster than international demand¹.
- ◆ FHT's portfolio of 15 quality assets are in prime locations within key cities of Australia, Asia and Europe. Given the sizeable domestic tourism markets in Australia, Japan and the UK, a rebound in domestic tourism is likely to help FHT's properties in these countries recover sooner than the rest of its portfolio.
- ◆ While uncertainty remains, FHT continues to position its portfolio for the eventual recovery of international tourism.
- ◆ FHT continues to have sufficient liquidity to ride through these extraordinary times. The master lease structure for its properties also helps to mitigate the adverse impact of the COVID-19 pandemic.
